

Here is the URL for the live version:

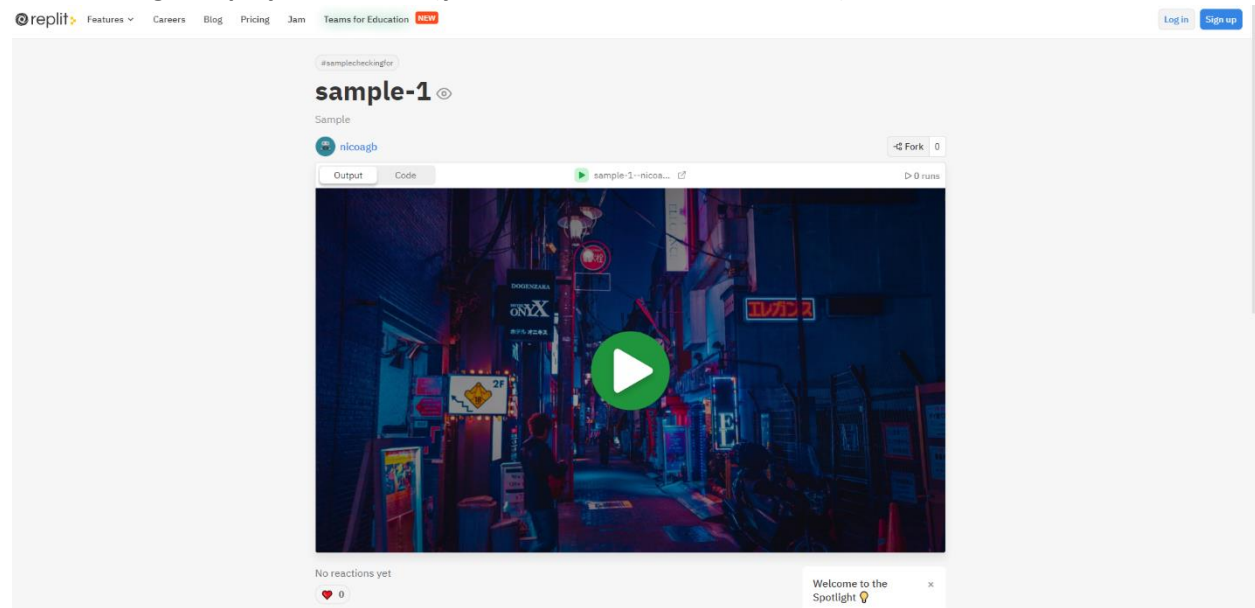

<https://sample-1.nicoagb.repl.co>

Before trying the live version:

1. Access this first

<https://replit.com/@nicoagb/sample-1>

2. Click the green play icon to run (you can also see the source code)

I also attached the project for running it in local.

API ENDPOINTS

`/auth`

- authentication (POST)

`/users'`

-GET (Retrieve all list)

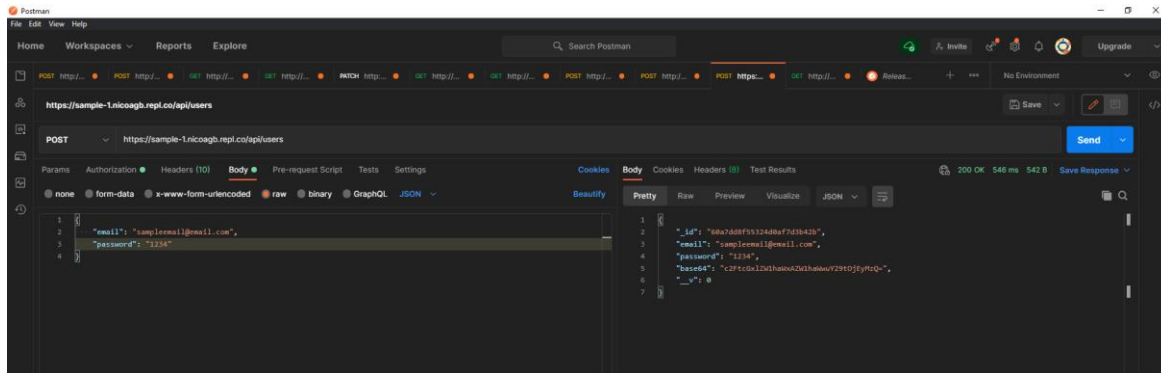

-POST (add user)

-PATCH(EDIT CURRENT PROFILE

`/users/:id'`
